Established in 1987, Ray Owen Plating Ltd has grown to one of the leading zinc plating facilities in the Midlands. Operating from our new purpose-designed factory in Telford, the basis of our success has been a commitment to provide unrivalled standards of quality and service which are unique in our industry.

As part of our ongoing investment programme we have now installed the largest processing line in the Midlands to enable us to handle even the highest volumes with those same levels of service and quality.

Our customer base includes Perkins Engines, Dynacast UK, Denso Manufacturing and many other specialist engineering and manufacturing companies.

We have an established track record of a flexible and responsive approach to our clients' needs.

We can accommodate short-notice projects of any scale and our management team has the depth of practical experience to ensure that the most appropriate and effective solution will be applied to any project requirement.

#### Our facilities offer the following:

- Fully automated barrel facilities
- Trained and committed staff
- Flexible shift system
- Fully automated rack facilities
- An Active Secondary Operations to suit your requirements
- Laboratory facilities
- Your telephone call will be answered directly by someone who can detail the progress of your components
